ABOUT ME

Passionate and creative software developer currently completing a Higher Vocational Degree in Multiplatform Application Development. Experienced in web and mobile development using PHP, JavaScript, SQL and more. I love building things that work beautifully, learning fast, and contributing to real-world projects with genuine curiosity and drive. Currently on an Erasmus+ internship in Prague, exploring AI-driven development and international work environments.

EXPERIENCE

Software Developer (Erasmus+)

Buinsoft Technology S.R.O.

Mar 2026 – Present · Prague, Czech Republic (Hybrid)

Completing my Erasmus+ internship as a Software Developer at Buinsoft in Prague. Developing tailor-made digital solutions with a strong focus on AI-driven automation and business transformation. Gaining hands-on experience in an international tech environment and expanding my skills in modern development practices.

Web Application Developer

Lanzadera Music

Jan 2025 – Present · Spain

Developing and maintaining web applications using PHP, SQL and JavaScript. Focused on improving user experience and backend performance, delivering reliable and efficient solutions tailored to different business needs.

Web Application Developer

Central Loyola SAFA

Apr 2023 – Present · Spain

Designed and implemented custom web solutions for internal institutional projects. Managed and optimised SQL databases, handled front-end/server integration and worked with external APIs (Google, REST) to extend project functionality. Strengthened full-stack skills within a real team environment.
